

PRIVACY POLICY

Last updated: 2026

GENERAL INFORMATION MY SHOP - DUKKANIM application ("Application") has been developed to facilitate business management, stock tracking, and current account analysis processes. This text aims to inform you about how your data is processed during multi-device synchronization and license verification processes.

CLOUD SYNCHRONIZATION AND ACCOUNT LOGIN The application uses a secure cloud synchronization infrastructure to prevent data loss and enable simultaneous operation on multiple devices. Users must securely log in using Google, Apple, or Email methods to use the application. After logging in, your commercial data is synchronized and stored securely in our encrypted cloud database and your device's local memory, specific to your account.

LICENSE AND INTERNET CONNECTION REQUIREMENT The application must connect to the internet at least once every 15 days to check license validity and device seat rights. For devices whose offline usage period exceeds 15 days, application access is restricted until an internet connection is provided for security and license verification purposes.

DATA SHARING AND ADVERTISING The application NEVER SHARES, SELLS, or RENTS your commercial or personal data with third parties. No advertisements are displayed within the application, and no third-party analysis services that track user movements (tracking) are used.

REQUIRED PERMISSIONS The application may request permissions only for the following functions:

- **Camera:** For barcode/QR code scanning operations.
- **Storage:** For local file management and data transfers.
- **Gallery:** For adding visuals to products. Apart from these permissions, personal data on your device (contacts, messages, etc.) is strictly never accessed.

PAYMENTS AND SUBSCRIPTION Purchase and subscription transactions are processed through the Apple App Store / Google Play Store infrastructure and secure subscription providers. Your credit card and payment information are not seen, processed, or saved by the application.

DATA SECURITY Your data is protected at the highest security standards (encrypted) both on your device and on our cloud servers. The physical security of the device and the protection of the screen lock are the responsibility of the user.
